

Wednesdays
9.00am - 3.00pm

1A Clarke Road, Waitara

\$5/session
+ NDIS funding

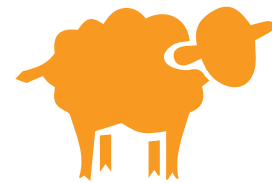

This program supports you to develop skills to carry out basic farm tasks. You will visit different farms and directly interact with farm animals to learn about each animal and how to care for their needs. You can use this and apply it at home when looking after your pet.

Depending on the season, you will also visit farms that will complement your animal interaction with fruit picking opportunities. The nature of this program creates positive avenues for understanding non-verbal communication and interaction with nature in naturally therapeutic environments.

FARM SKILLS

LEARN THE BASICS OF
ANIMAL CARE

Program code: FS01

Topics & Outcomes:

UNDERSTAND NON-VERBAL
COMMUNICATION

BASIC ANIMAL CARE
